

## BS200 CC Backplanes

The backplanes for BS200 CC for the extended temperature range (ColdClimate) interconnect the M1 controller hardware modules, such as power supplies, CPU modules and I/O modules, mechanically and electrically. They are the backbone of the controller.

- 1 to 16 module slots
- Seamless connection / possible
- Stable mechanics / compact design
- Vibration proof fixing of modules
- Can be snapped on EN 60715 DIN rail
- ColdClimate design  
(protected against temporary condensation)
