

PCC201 PC-Cards

The PCC201 PC cards serve as a storage medium of the M1 controller. Depending on the memory extension, the PC cards may contain source codes and pieces of documentation in addition to the operating system, the drivers and the application software.

The PCC201 cards can directly be written to and formatted in all processor modules of the M1 controller. With an A-PCC200 adapter it is possible to use the PC cards in the PCMCIA slots of PCs and notebooks.

The PCC201 series is produced entirely in-house and therefore long-term supply is guaranteed.

- Memory capacity 32 / 64 MB
- Access width 16 bits
- Designed as 5 V card
- Program voltage of 12 V_{ss}
- Write protection via operating software

Item	Item-No.
PCC201/32	00012081-30
PCC201/64	00012081-40
A-PCC200	00009540-00

PCC201	
Basic data	
Register	No CMR (Component Management Register)
Powerdown mode	Not possible
Information	All information is stored in CIS (Card Information Structure)
Operating voltages	
Operating voltage	5 V (min. 3 V for FLASH memory)
Program voltage	12 V
Approvals / Certificates	
General	CE, cULus, CCC
Ambient conditions	
Operating temperature	0 to +60 °C
Rel. humidity operation	5 to 95 % without condensation
Storage temperature	-40 to +85 °C
Rel. humidity storage	5 to 95 % without condensation

Order Codes		
Item	Item No.	Description
PCC201/32	00012081-30	PC Card 32MB
PCC201/64	00012081-40	PC Card 64MB
Accessories		
A-PCC200	00009540-00	Adapter for PCC-Card
