New Revision of NT255 Power Supply Modules

Dear Customer,

We are pleased to inform you of **product improvements** to the M1 automation system.

The NT255 power supply is available in an improved version with design version KR 121.000:

- Modification to the power supply unit (prevention of short voltage increases in the event of an external power supply failure also in unfavorable load conditions)

Besides the standard variant, there is also the ColdClimate model (CC) for extreme climatic conditions including condensation (cold climate / damp heat).

Design version and article number were changed in order to ensure a clear distinction in the field and in logistics. The previous design version (KR 108.000) is being discontinued and will be fully replaced by the current KR 121.000.

The new design version is basically compatible with the previous version.

Product data:

Article designation	Article type	Article no. to date		Article no. new
NT255	Hardware	00013251-00	⇒	00031426-00
NT255 CC	Hardware	00016158-00	⇒	00031427-00

Note: Article numbers for combined products (e.g entire control devices) containing one of the above products will also be modified with the revision.

Dates

Valid from: 01.09.2019

The new modules will be available for sale between September and October 2019 depending on the model variant. Orders of the old design version/article numbers which are no longer covered by the appropriate stock will be returned with the notification of the modified article number and a request to correct the order. We recommend that the new articles are entered in your ordering system in good time.

The updated **product data sheet** for the new design version of the NT255 power supply modules is available in the download area of our website. Your customer contact and our Customer Service will be glad to help you with further inquiries via the [HelpDesk](#) or by phone on +43 (0) 5522 / 3497 0.

Mit freundlichen Grüßen/Yours sincerely,

Bachmann electronic GmbH
